PART I

Preface
Committee Member

Chapter 1. Historical Background
  1.1 In the Feudal Period
  1.2 Education between 1868 and 1947

Chapter 2. The Present State of Chemical Education
  2.1 Elementary Schools and Lower Secondary Schools
  2.2 Upper Secondary Schools
  2.3 Technical Colleges
  2.4 Institutes of Technological Sciences
  2.5 University Entrance Examinations
  2.6 Universities
  2.7 The Chemical Society of Japan and its Division of Chemical Education

Chapter 3. Teacher Training
  3.1 Innovation of the Teacher Training System
  3.2 Prescription of Subjects and Credit for Certification
  3.3 Course on Methodology for Teaching Chemistry
  3.4 Practice Teaching
  3.5 In-Service Training of Teachers

Chapter 4. Reformation of Chemical Education with the Popularization of Education
  4.1 Introductory Remarks
  4.2 General Education in the Universities
  4.3 Specialized Education
  4.4 Upper Secondary Schools
  4.5 University Entrance Examinations
